

ROHITAH INTERNATIONAL

Global Public Health Data Systems & AI-Assisted Solutions

Institutional Services Portfolio

With over 20 years of expertise, Rohitah International is positioned at the intersection of public health science, digital infrastructure, and AI-enabled evidence systems. We empower institutions with the tools they need to generate and act on high-quality health evidence.

01. Data Quality & AI-Assisted Intelligence

Transforming fragmented public health data into analysis-ready assets through machine-learning validation and automated governance.

- AI-Assisted Anomaly Detection & Validation
- Data Report Cards: Quality Scorecards
- HIS Audit & Strengthening
- Data Governance Frameworks

02. Digital Tools for Public Health

Practical, customized digital solutions for data collection, interoperability, and unified reporting flows.

- Survey Tool Customization (ODK, Kobo, REDCap)
- Executive & Operational Dashboard Interfaces
- Offline-Capable Mobile Data Applications
- Data Flow Automation & System Integration

03. MEL Support & Evidence Systems

Rigorous frameworks that convert program data into actionable evidence for adaptive management.

- Results Framework & Indicator Development
- MEL Plan Design & Learning Agenda
- Outcome Evaluation Infrastructure
- Donor Reporting Compliance

04. Institutional Strengthening

Grounded in adult learning principles to produce lasting institutional data literacy and competency.

- Role-Specific Data Literacy Training
 - Competency Framework & Certification
 - Technical Coaching & Embedded Advisors
 - SOP & Institutional Toolkit Development
